

AIDS 2020 Track E abstract submission categories

Track E – Implementation research, economics, systems and synergies with other health and development sectors

Global and national financing, economic evaluation and sustainability

E1	National financing analyses and initiatives
E2	Transitional financing
E3	International assistance, frameworks and funding mechanisms
E4	Financing HIV within UHC frameworks
E5	Evidence on payment by results and other performance-based mechanisms
E6	Approaches to achieving sustainability
E7	Economic evaluation and affordability assessments
E8	Supporting sustainable financing for civil society
E9	Financing HIV drug access: The economics of generics and differential pricing structures
E10	Funding for HIV programmes and services

Opportunities for economies of scale and scope

E11	Evidence from integration of health services
E12	Evidence from cross-sectoral programming
E13	Approaches to financing across sectors

Cost effectiveness and affordability

E14	Assessments of cost effectiveness: Provider and community perspectives
E15	Economics of affordability

Health systems and new partnerships

E16	Supporting effective linkages between maternal and HIV services
E17	Approaches to effective HIV/SRH integration
E18	Approaches to effective HIV/TB service delivery
E19	Supporting resilient health systems
E20	Making health systems work for adolescents
E21	Community participation in systems for health
E22	Delivering paediatric HIV services
E23	Approaches to minimizing loss in the prevention/treatment cascade
E24	Getting policies into practice
E25	Systems serving underserved populations
E26	HIV services in healthcare and/or community settings
E27	Evidence on making task shifting work
E28	Systems to deliver effective, long-term chronic care
E29	Integrating mental health and wellness in HIV programming
E30	Public-private partnerships

Programming at scale

E31	Approaches to scale and the optimization of service delivery
E32	Methods to improve service quality, support and tailoring of services
E33	PrEP: Lessons learned from delivery
E34	Testing and treatment at scale: Issues and lessons
E35	HIV self-testing for HIV and linkages to prevention and care
E36	Approaches to viral load monitoring at scale
E37	Innovations and lessons for supporting adherence
E38	Adolescent and youth programming
E39	Key populations in humanitarian settings and fragile contexts (including migrants)
E40	Mental health and HIV
E41	People living with HIV and TB
E42	Differentiated service delivery
E43	Strategies to increase uptake of retention in HIV services
HIV and development synergies	
E44	Combination programming on social drivers of HIV (including education, violence and workplaces)
E45	Delivering gender-transformative programmes and tackling violence against women and girls: Programmatic lessons
E46	Social protection: New evidence and programmatic lessons
Innovations in data collection, monitoring and evaluation	
E47	Innovations in behavioural data collection and use
E48	Innovative approaches to track individuals
E49	Innovative uses of data to strengthen systems and programmes
E50	Approaches to using data to improve programming
E51	Evaluating large-scale programmes: Approaches to rigorous evaluation
E52	Implementation science: Lessons from researcher-programme partnerships
E53	Combination prevention: Evaluation methods
E54	Effective approaches to linking population and programme data to inform HIV programming
E55	Data and accountability and transparency
E56	Monitoring and reporting in the SDG era
COVID-19	
E57	Optimizing HIV Prevention and Treatment Implementation Strategies in the COVID-19 Pandemic Era
E58	Characterizing Implications of COVID-19-related Funding Disruptions to HIV Prevention and Treatment Programs
E59	Impact of COVID-19 on HIV programs (including drug supply, adherence, impact on DSD)
